

WHY CHOOSE Shade Systems™ ?

- √ **Turn-N-Slide™ Easy Fastening System**
 - Makes it easy to remove and re-attach the fabric canopy for the winter season or in case of severe storm such as hurricanes (most other shade companies' products are permanent and require professional installers to remove and re-install the canopy).
 - See our demonstration video at www.shadesystemsinc.com

- √ **Engineered for high winds**
 - Meets or exceeds International Building Code (IBC)
 - 150 mph wind speeds for frame only
 - 90 mph wind speeds with canopy attached

- √ **Extensive warranties**
 - 20 years on metal frames against rust-through corrosion
 - 10 years on CoolNet™ shade fabric against deterioration
 - 10 years on CoolNet™ stitching thread against deterioration
 - 10 years on Turn-N-Slide® Easy Fastening System

- √ **Fire Rated**
 - CoolNet™ Shade Fabric is treated with fire retardants, and passes the requirements established under the NFPA 701 Test Method 2 test standards for flammability, including the accelerated water leaching protocol. Ask for a copy of the test results.

- √ **Provides Shade and Foul Ball Protection**
 - Up to 99% U.V. screening protects against sun overexposure
 - Reduces temperatures by up to 15-20 degrees
 - Perfect for play areas and concessions near ball fields, as stray fly balls bounce harmlessly off the canopy

the coolest solutions under the sun®
